PROFILE

Recent Computer Engineering graduate with hands-on experience in AI-native development, SQL data analysis, and LLM-powered tooling. Proficient with Claude Code and AI-first workflows. Passionate about rapid prototyping and translating real user needs into functional software, with a strong interest in edtech and healthtech applications.

SKILLS

AI Tools: Claude Code, Anthropic API, OpenAI API, Cursor, Lovable, Bolt.new
Languages: Python, JavaScript, TypeScript, SQL
Frontend: React Native, Expo, React, HTML, CSS
Backend & Databases: Supabase, PostgreSQL, Node.js, REST APIs
Data & ML: Pandas, NumPy, Scikit-learn, HuggingFace, BERT, DistilBERT, NLP
Design & Workflow: Figma, Google Workspace, Git, GitHub, Agile, Prompt Engineering, ETL Pipelines

---

PROJECTS

Go-HAWK *React Native · Expo · Supabase · TypeScript · Twilio · Google OAuth*

- Built a production-ready cross-platform mobile application (Android and iOS) with 2 authentication methods (OTP via Twilio and Google OAuth), handling real-time data, user authentication, and cloud storage end-to-end
- Resolved 10+ complex multi-provider authentication bugs independently, cutting auth-related errors to zero before final release
- Integrated Anthropic API for AI-powered features across 3 core screens, iterating through 5+ feedback cycles to improve usability and response quality

Go-Hawk PDF Tools *React Native · Expo · TypeScript · pdf-lib · Node.js*

- Designed and built a mobile-first PDF utility application with 6 core tools (merge, split, compress, rotate, delete pages, reorder pages), supporting files up to 50MB with offline processing
- Achieved approximately 40% file size reduction at high compression settings using a Node.js and pdf-lib backend, with real-time before/after size comparison displayed to users
- Delivered a complete UI with drag-and-drop reordering, page thumbnail previews, and smooth Reanimated transitions, reducing average task completion time by an estimated 30% versus web alternatives

Fake News Detection System *BERT · Python · HuggingFace*

- Fine-tuned a BERT model on 20,000+ labeled news samples, achieving 94.3% classification accuracy, and deployed the model as a REST API serving real-time predictions in under 300ms

---

EDUCATION

B.E. Computer Engineering *2025 | Mumbai, IN*
Vasantdada Patil Pratishthan's College of Engineering and Visual Arts

- **IBM Data Science Professional Certificate** — Coursera / IBM (Python, SQL, Machine Learning, Data Visualization, NLP)
